Appendix 5.2

New Movie Renting Application

Be One of the First to Use the New Application!

Scenario [　]

Membership Fee	Rental Cost per Movie

You must present the scenario assigned to you by creating a report which contains:

- an example of a pattern of membership cards corresponding to the rental of 0 movie, 1 movie, 2 movies, 3 movies and 4 movies taking into account the membership fee;
- a table of values that represents the relationship between the number of movies rented and the cost;
- the wording of a rule that allows the rapid determination of the amount paid by a client based on the number of rented movies;
- a name for the new application.
