Appendix 2 Rep.3

Name: _____

The Teacher's Helpers

Mrs. Cadieux needs extra students to help her organize a party. Make a list of students in the class that she could choose to help her. Write the students' names in the box below.

Let's assume that Mrs. Cadieux already has 25 students helping her. How many will there be if she decides to choose all the students you have suggested? Write on a piece of paper the counting strategy you used to determine how many students would participate in organizing the party.
