Appendix 6.4

Dart Game (Version 2)

For situation 3, indicate where two more darts would have to be so that the sum of the points obtained equals the points generated by the illustrated dart. Explain your choice and write the number sentence corresponding to the situation.

For situation 4, first add the missing points in three of the sectors of the target. These points must be different from those in situation 3. Then, Indicate where two more darts should be placed on the dartboard so that the sum of the points obtained is equal to the points generated by the dart illustrated.

Explain your choice and write the number sentence corresponding to this situation.
